

Listing and Amendments to the Claims

This listing of claims will replace the claims that were published in the PCT

5 Application:

[001] ~~-(Currently amended) Method-A Method~~ for constructing a list of favourite services ~~(FAVi)~~ in a receiver ~~(1)~~ suitable for receiving audio and/or video digital services comprising means of storage ~~(4)~~ of a first list of available services ~~(LG)~~
10 in which each service possesses a unique identifier,

characterized in that wherein the method comprises the steps of:

(a) recovery of a second list of services ~~(TDS)~~ comprising for each service the unique identifier and at least one value of selection criterion;
(b) determination of a subset of the second list of services as a
15 function of at least one selection criterion;
(c) creation of said list of favourite services on the basis of the common services between the first list of available services and the subset of the second list of services.

20 [002] ~~(Currently amended) Method-The method~~ according to Claim 1, in which the first list of services is a list of the services available in the digital streams actually received by the receiver.

25 [003] ~~(Currently amended) Method-The method~~ according to ~~one of Claims 1 or 2~~ claim 1, characterized in that wherein the second list comprises at least the services potentially receivable by the receiver and in that the first list is a subset of the second list.

30 [004] ~~(Currently amended) Method-The method~~ according to ~~one of Claims 1 to 3~~ claim 1, characterized in that wherein the selection criterion of step (b) is a

selection criterion or a logical combination of selection criteria entered by a user on the basis of the criteria of the second list.

5 | [005] ~~(Currently amended) Method~~ The method according to ~~one of Claims 1 to~~
3 claim 1, characterized in that wherein step (b) comprises a step for
determining a default criterion or a logical combination of default selection
criteria ~~(TCD)~~.

10 | [006] ~~(Currently amended) Method~~ The method according to Claim 5,
characterized in that wherein steps (b) and (c) are repeated for several default
selection criteria or logical combinations of default selection criteria to create a
plurality of default favourite services lists.

15 | [007] ~~(Currently amended) Method~~ The method according to ~~one of Claims 1~~
~~to 6~~ claim 1, characterized in that wherein the second list is:

- sent by transmission on a channel able to be received by the
receiver ~~(1)~~;

- accessible in the receiver ~~(1)~~ by downloading from a remote server;
or

20 | - embedded in the receiver.

[008] ~~(Currently amended) Method~~ The method according to ~~one of Claims 1 to~~
7 claim 1, characterized in that wherein the first list is extracted from stream
description tables included in the stream or streams actually received by the
25 | receiver, the said stream description tables indicating the services transmitted
in the received stream or streams.

[009] ~~(Currently amended) Method~~ The method according to ~~one of Claims 1~~
~~to 8~~ claim 1, characterized by wherein a step of updating at least one from

among the first and the second list by transmission in a stream able to be received by the decoder or by downloading from a server.

- 5 [010] ~~(Currently amended) Receiver~~ A receiver of audio and/or video digital services comprising means of storage ~~(4)~~ of a first list of actually available services ~~(LG)~~ in which each service possesses a unique identifier, characterized ~~in that~~ wherein it furthermore comprises
- means of storage ~~(4)~~ of a second list of services comprising for each service at least one value of selection criterion,
 - 10 - means for creating a favourite list ~~(3)~~ that are designed to receive at least one selection criterion and to establish a favourite list by determination of the services of the second list corresponding to the said at least one selection criterion and present also in the first list of services.
